

PIET ZWART

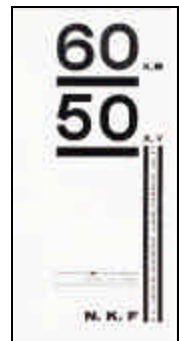

ars libri ltd

A collection of some 50 items of graphic design by the great Dutch modernist designer Piet Zwart (1885-1977).

Among them are famous projects for the Nederlandsche Kabelfabriek Delft (NKF)—among them the 1929 English edition of the cable catalogue, his masterpiece, and proofs of classic advertisements—and for the Netherlands Post Office (PTT).

The collection includes some extremely fine examples of early broadsides and small-format posters, and exceptional booklets and pamphlets, as well as a variety of advertising ephemera, such as a series of photomontage calendar cards for the manufacturers Bruynzeel. Also present are books and periodicals of his design, from early in his career to late.

The collection is accompanied by a group of reference books and exhibition catalogues on Zwart and his work.

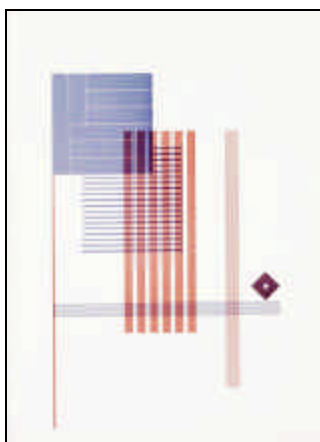

Further details and price on request.
